PROFESSIONAL SUMMARY

Results-driven WordPress & Shopify Full Stack Developer with 3+ years of hands-on experience designing, developing, securing, and optimizing high-performing eCommerce, LMS, marketplace, SaaS, and lead-generation websites. Strong expertise in WordPress, Elementor Pro, Oxygen, Bricks, Divi, Shopify, WooCommerce, HTML, CSS, JavaScript, PHP, and MySQL, extended into custom web application development with Laravel, React, TypeScript, and Supabase. Experienced in building custom plugins, client portals, and dashboards; integrating CRMs, APIs, and AI-powered automation (GoHighLevel, n8n, Make, LLMs); and delivering technical SEO, AEO/GEO, conversion optimization, malware removal, and hosting management. Successfully delivered 250+ projects, providing clients with secure, scalable, fast, and conversion-focused digital solutions.

TECHNICAL SKILLS

- **CMS & eCommerce:** WordPress, Shopify, WooCommerce, Multi-Vendor Marketplaces (Dokan), LMS Websites, Multilingual & Multisite WordPress

- **Security & Maintenance:** cPanel & Managed Hosting, Malware Removal, Security Audits, Hardening, Backups, Email Deliverability (SPF/DKIM/DMARC), Cloning & Migration, Bug Fixing
- **SEO & Performance:** Technical, On-Page & Local SEO, Schema Markup, AEO & GEO, Search Console & GA4, Core Web Vitals Optimization

WORK EXPERIENCE

WordPress Developer March 2023 – 3 November 2026

Tech Thrill – Bahawalpur, Punjab, Pakistan

- Designed and developed responsive WordPress websites — including business, service, eCommerce, LMS, multilingual, and multi-vendor marketplace platforms — using Elementor Pro, Oxygen, Bricks, Divi, and Beaver Builder.
- Built custom WordPress plugins, child themes, and ACF-powered templates, plus custom dashboards and admin interfaces tailored to client workflows.
- Resolved WordPress bugs, plugin conflicts, and theme errors; executed cloning, migration, and redesign projects while preserving data integrity, redirects, and SEO rankings.
- Performed malware removal, spam-link cleanup, security audits, and website hardening to protect client sites against threats and vulnerabilities.
- Managed hosting on cPanel, Hostinger, SiteGround, and WP Engine, resolving DNS, SSL, email deliverability, and server configuration issues.
- Optimized sites for speed, Core Web Vitals, and SEO; built conversion-focused Google Ads landing pages, lead forms, and booking funnels.

Front-End & Back-End Developer Jan 2023 – 3 November 2026

Tech Thrill – Bahawalpur, Punjab, Pakistan

- Developed custom websites and web applications using HTML, CSS, JavaScript, TypeScript, PHP, MySQL, Laravel, and React.
- Built a SaaS recruiting platform (ATS) with an email-marketing module using React, TypeScript, Supabase, and Vercel, featuring role-based access, multi-provider email sending, and accessibility compliance.

- Developed custom PHP portals and LMS platforms with staff, client, and admin dashboards, scheduling, timesheets, and secure role-based access.
- Integrated third-party APIs, webhooks, and services (Resend, SendGrid, Twilio, Google APIs) to automate workflows and communication.
- Collaborated with clients and designers to turn requirements into functional, user-focused solutions, and maintained them for long-term stability.

Shopify Developer Jan 2022 – Jan 2023

SilverMind Solutions – Bahawalpur, Punjab, Pakistan

- Built and customized Shopify stores for dropshipping and eCommerce businesses, with a strong focus on conversion optimization.
- Managed product hunting, product listings, and complete store configuration from setup to launch.
- Customized Shopify themes to enhance UI/UX; integrated third-party apps and optimized overall store performance.
- Ensured mobile responsiveness and applied on-page SEO best practices to improve store visibility and organic traffic.

SEO, AI & AUTOMATION EXPERTISE

- **SEO, AEO & GEO:** Building SEO into every site — technical audits, schema markup, internal linking, and entity optimization for visibility in Google and AI-powered search engines.
- **Conversion Optimization:** Designing clear CTAs, trust sections, lead forms, booking funnels, and call and conversion tracking to turn visitors into qualified leads.
- **CRM & Workflow Automation:** Connecting websites to GoHighLevel, n8n, and Make for form-to-CRM routing, pipelines, automated follow-ups, and lead notifications.
- **AI Integrations:** Implementing AI chatbots, FAQ assistants, AI lead qualification, and LLM-powered features through APIs and webhooks.

SECURITY & HOSTING EXPERTISE

- **Hosting Management:** Complete handling of cPanel, Hostinger, SiteGround, and WP Engine environments — DNS, SSL, email, databases, downtime, server errors, and PHP version conflicts.
- **Malware Removal:** Detecting, cleaning, and removing malware, backdoors, spam links, and injected code from compromised WordPress and eCommerce websites.
- **Security Audits:** Conducting full website security audits, identifying vulnerabilities, and implementing hardening measures, firewalls, and secure configurations.
- **Email Deliverability:** Configuring SPF, DKIM, and DMARC records and SMTP services to ensure reliable inbox delivery of website and transactional emails.
- **Preventive Security:** Regular backups, update management, login protection, and monitoring to keep client websites safe and recoverable.
